One of **the biggest benefits** to those who sincerely practice with the Symbol of Life is that your undesirable habits and weakness will come to lose their hold on you. Once you visually construct this Archetype of Archetypes on you, it rejects those things that are unhelpful, unbeneficial, and hold you back in life. It is your protective shield.

You will receive training on how to create this **Ally type elemental** that will come to aid you in dropping outdated or harmful patterns as well as to uplift your awareness and raise your consciousness.

The beginning of this seminar will reveal the first descent of humankind, from its eternal source into the ethereal world of Eden and on into physical incarnation in the Antediluvian civilizations.

We will follow the development of the first humans through the different levels of consciousness over exceptionally long periods of time from Lemuria to Atlantis and into the ancient Egyptian civilization. The Symbol of

Life originated with the Lemurians and was taken to the Atlanteans who brought it to Egypt where it was integrated into the early teachings of the Egyptian Mystery schools.

Later the Greek & Egyptian Mystery School teaching on the 12 labor of Heracles

was incorporated into the Symbol of Life practice. The first step on this or in any sincere spiritual practice is not to calm down or tame your lion of anger but to kill it completely. So, the hero Heracles' first duty was to kill the monstrous Lion of Nemea with his bare hands because its skin was impenetrable to any weapon.

Instructions will be provided for making your first four steps up the beautiful Path of Light (central pillar) on the Symbol of Life. These are keys that open the doors to the secrets of higher realities.

This seminar is for those who have been engaged with the teachings of Daskalos and the Researchers of truth and want to deepen their studies, experiences, and understandings.

Blessings,

Daniel & AKI
